

# DREAM WEAVERS

Pattern is back in a big way. Maybe it's just a reaction to the recession, but fabric manufacturers have picked up on people's need to escape—visually if not actually. Their new collections invite hotel guests and restaurant patrons to explore the richness of the Renaissance, the exoticism of North Africa and art influences from William Morris to Andy Warhol. Color can be a kaleidoscope affair of vivid brights or a barely-there blush, depending upon the mood of the space. One shade that unites all these options is green. New technology and materials have expanded the list of eco-friendly fabric options from budget-conscious ranges to the most luxurious.
