

BOLD BEDDING

Genesis Bedding | *FabTex Inc.*
www.fabtex.com

» Genesis Bedding by Fabtex is the newest collection from the fabricator of hospitality bed coverings and window treatments. Created from the bold colors, stylish patterns, and rich textures of Genesis Fabrics, this new collection of bedding and draperies is designed to make it easy to add style and refinement to any guestroom.

WIRELESS CHARGING

Powerpack | *Powermat*
www.Powermat.com

» The Powermat Powerpak allows consumers to upgrade to wireless charging without changing their existing phone's ergonomics and design. The technology can be applied to virtually any phone. In addition, a new line of single-, double-, and triple-position mats— Powermat 1X, Powermat 2X, and Powermat 3X—for home and office use are available. These new models offer a wider range of price points to a broader range of consumers. Powermat is also expanding its support of the iPhone 3G/3GS by introducing two new models: a silicone case receiver and an extended battery case receiver, which combines the dual benefits of extended battery life and wireless charging.

FAST, FATIGUE-FREE CLEANING

VacRide | *Advance*
www.advance-us.com

» The VacRide combines dual brushes, vacuum motors, and certified-HEPA filters, to offer soil removal and dust containment. The ride-on platform allows cleaning staff to drive the machine instead of pushing, which cuts cleaning time, while also reducing operator fatigue. It features a 28-inch vacuum deck with a standard side broom, which together provides a 34-inch total cleaning path. A large 1.2 ft³ bag lets operators clean for longer periods of time. The unit offers quiet mode, which reduces the operating sound level to 64 dBA, allowing staff to clean during the day without disturbing building occupants. A detailing wand lets operators reach hard-to-clean areas. The VacRide fits through doorways and in standard elevators.
