

SHOWER CURTAIN SEWING DETAILS

Fabrication

Standard shower curtains are fabricated as follows:

Top Hem:

1 ½" wide, triple thick, double lock stitched.

Side Hem:

Fabric Shower Curtains: 1" wide, double thick, single lock stitched.

Vinyl Shower Curtains: None

Bottom Hem:

Fabric Shower Curtains: 1" wide, double thick, single lock stitched.

Vinyl Shower Curtains: None

Vertical Seams:

½" wide, double turned and double lock stitched.

Grommets:

½" nickel plated brass, rust resistant metal grommets spaced 6" on center. Standard color is silver.

Thread:

Nylon thread is color matched per each curtain.

Each curtain is tabled and patterned matched to ensure that every curtain has only the highest level of quality.

All curtains are custom made and can be ordered any size to be adapted to any situation.

Vertical striped patterns are sewn railroaded to ensure the integrity of the design.

All stitching is performed with lock stitching sewing machines.

Mesh

Standard mesh is 20" color: Snow unless otherwise noted. All nylon mesh has ½" holes to pass fire regulations. Optional colors and sizes of mesh are available. Mesh is also available in the following widths:

12" (30.48cm)	28" (71.12cm)
18" (45.72cm)	32" (81.28cm)
20" (50.80cm)	36" (91.44cm)
22" (55.80cm)	39" (99.06cm)

If mesh is not used, P.V.C. drops or stainless steel drop chains are available.

Markings

All curtains are sewn with a marked size and a fire marshal identification label (California Title 19) for easy drapery identification.

Quality Control

All curtains are quality checked and placed in clear plastic bags before being placed in heavy duty corrugated boxes.
