Absolutely Breathtaking.

Let **digitally-printed wallpapers** create focal points and dramatically transform your spaces into memorable experiences.
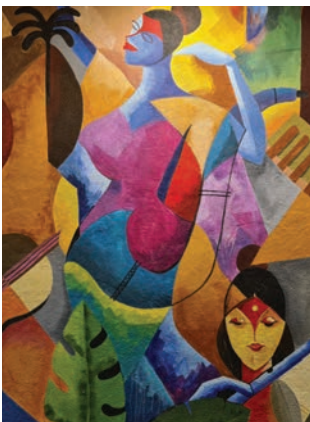

- Eco friendly
- Vibrant colors
- 15-year life
- Installation services available

Endless Possibilities

Start with a piece of art, photography, graphics, illustration or stock imagery. Our state-of-the-art printers can match a wide range of pantone or paint swatches with a high level of accuracy on commercial-grade wallpaper. The only limit is your imagination.

Refresh high-traffic public spaces and even back of house areas with floor-to-ceiling murals of any theme:

FAQs

What surfaces can I mount the wallpaper to?

Our wallpaper will adhere to drywall, new and old plaster, concrete walls, masonry, and paneled walls. You can even mount over tile and other slick, non-porous surfaces such as concrete blocks or synthetic laminate paneling that has been primed with lining paper.

Any limitations to what you can print?

We can only print non-metallic, matte colors on white/off-white, untextured wallpapers. If you require color matching, we will need a physical sample mailed to our California office for reference. Ordering a sample is always recommended when customizing a color.

How do I order?

You may get a quote or place an order via **sales@fabtex.com**. All orders are sold by the square foot and sized to your specific dimensions. These projects are typically printed in panels that measure 48" wide by the height of your space. When placing an order, please provide the dimensions of the space, whether it be a wall, a full room, or framed panels.

What file types can I submit?

We can work with both repeatable patterns and high-resolution imagery. For Raster-based imagery, we prefer .psd (Photoshop), .tif, .pdf, or .jpg files at a resolution of 300dpi or higher with a minimum of 1" bleed on all sides. For Vector-based designs we prefer .ai (Illustrator), .eps, or .pdf files. For both types, CMYK color mode is preferred. If you're not sure about your image resolution, please contact us for a consultation.

Can you help me create a design?

We offer design services at $80 per hour and will pair you with a designer to help bring your vision to life. We will always do our best to accurately quote the project before starting on your design; however, design hours can fluctuate depending on the complexity of the request. Each request is inclusive of 2 minor revisions.
